

Passage slabs

Passage slabs are manufactured either as pre-stressed or reinforced concrete slabs. Pre-stressing allows for an insitu screed to be cast on top. Finished precast slabs are quick to install. Hatch panels can be incorporated for slurry pump access. Thickness from 150 mm upwards manufactured to suit your project.

Design Features

- Pre-stressed to allow an overlay slab
- Precast to give a finished passageway
- Quick and easy to install
- Made to length to suit your project
- Designed to current BS EN standard
- Incorporated lifting socket for installation with designed and certificated lifting devices

Uses for Passage Slabs

- Suspended flooring for feed passages, straw bedded areas, sawdust bays etc.

Design & Quality Assurance provisions

- Design certificates available for your building warrants
- Concrete design certificates supplied
- Concrete strength cube reports available upon request
- SEPA approved system
- Method statement for erection available
