

Wall Panels – A-Wall

A-walls are designed to interlock together and can fix to the ground. They are 3050mm (10ft) high and 1000mm long, with cast in sockets to aid installation.

Design Features

- Free standing and can be fixed down
- Easy to move with a forklift
- 3050mm high and 1000mm long segments
- Male / Female locking system to allow neat joints
- Designed to current BS EN standard
- Mastic sealant material can supplied for joints
- Can retain loads on either side

Uses for A-Wall panels

- Temporary bay dividers, eg grain stores
- Permanent wall where they are fixed to the ground
- Quick to move or setup a dividing wall

Design & Quality Assurance provisions

- Design certificates available for your building warrants
- Concrete design certificates supplied
- Concrete strength cube reports available upon request
