

Cattle slats Transverse

Transverse cattle slats are used where the slat is spanning across the width. They are commonly used on slurry channels. Slat design is based on your required load bearing and length requirements.

Design Features

- Allows heavy weight to cross the slats
- Mechanical installation required
- 178 mm or 200mm thick
- Design to current BS EN standard
- Manufactured to customers required length

Uses for Transverse slats

- On slurry channels where heavy weights cross them

Slat Type	Loading	Length	Width	Height
Transverse	6T Tractor	2.4 - 3.66 m	1.2 m	0.178 m
Transverse	10T Tractor	2.4 - 3.66 m	1.2 m	0.178 m

Design & Quality Assurance provisions

- Design certificates available for your building warrants
- Concrete design certificates supplied
- Concrete strength cube reports available upon request
