

Precast Sheep Dipper

We have developed a sectional sheep dipper tank; it comes in 5 sections or more depending on the length of your tank, which can be easily installed on a preformed foundation strip. This offers a long term option for sheep farmers when an old tank needs replacing.

Design Features

- Sectional tank in 5 components
- First down with a slide section and suction point for emptying
- Standard section to offer flexibility in tank volume
- Last down with a ramp to allow the sheep to exit the tank.
- Male / Female locking system to allow neat joints
- Hydrophilic sealant material supplied for joints
- Designed to current BS EN standard
- Site requirements a small concrete foundation for installation onto

Uses for Precast Sheep Dipper

- Replacement for old tanks

Design & Quality Assurance provisions

- Design certificates available for your building warrants
- Concrete design certificates supplied
- Concrete strength cube reports available upon request
