

Vehicle Crash Barriers

Precast vehicle crash barriers come in 3 meter lengths with a first and last down. They have a half check to allow them to join together and secured with bolts. They also have an incorporated lifting loop for handling. Our first or last down are handed to allow the continuation of the joints and are sloped toward the traffic, standard units are 2.7 tonnes.

Design Features

- 3 m long x 0.8 m high x 0.4 m long
- Half check joints to aid the joining together
